RICO SHIPS DIESEL POWERED PLATFORM TRUCKS FOR IMMEDIATE RELEASE

(November 22, 2006 - Medina, Ohio) RICO Equipment, Inc., has just announced their completion of two heavy duty, high capacity Rider Platform trucks. The capacities range from 80, 000 lbs to 90,000 lbs. Both units are powered by Cummins Turbo charged diesel engines. LPG Models are available.

The trucks will operate in a “steel mill” environment with a continuous duty operating cycle. Both units will be responsible for transporting skidded coils of steel.

A unique feature for both units is a roll out engine compartment. Not only did we design these trucks with durability in mind but also maintenance ease.

RICO, the leader in specialty lift trucks has shown again that durability and functionality can coexist.
