

RICO MANUFACTURING EXPANDS MACHINE SHOP

FOR IMMEDIATE RELEASE

(April 16, 2014 – Medina, Ohio) Rico Manufacturing invests in a complete expansion of its Plant and machining capabilities to better serve the material handling industry.

Rico's main Steel Fabrication and Processing Plant houses CNC machining centers, steel plant burning and metal forming machines, welding cells, sub-assembly bays and high production CNC saws.

Brand new production machines have been purchased; such as pallet changers and an entire machining center that will continue to minimize down time. A centralized programming office was constructed to advance output and machining capabilities enabling parts to be produced faster and at much larger quantities. Additional, larger cranes were brought in for the highest capacity machining and efficiency gains; service power was drastically increased and the building was completely rewired to allow even bigger, more efficient machines for future expansions.

“Rico understands the need for quick turn around and the importance of keeping a vehicle up and running at all times. We are dedicated to doing just that. By continuing to advance our capabilities we can ensure that our customers will not experience down time and will be serviced at the highest capacity possible. Our growth is driven by the demands of the industry and we are always planning for the future.” Says Rico President, Steve Shuck.

Rico Manufacturing is proud to be fabricators of the world's finest specialty lift trucks. RICO has pioneered the design, development and manufacture of specialized lift trucks with capacities ranging from 1,000 to more than 400,000 lbs. RICO's diverse customer base includes the industrial, military and commercial markets. For more information contact **Alexa Engist (330) 723-4050 ext. 200** or visit www.RicoEquipment.com
